

Here's what Nadejda says about herself:

I strongly believe when we broaden our mind and knowledge horizon we widen our freedom of choices. My purpose in my work is to develop never ending curiosity, to enable different point of view and to inspire team-members to share new ideas and knowledge. Emotional intelligence enriches the vivid color of our inner and outside world, it helps us to listen ourselves and others, awakens our senses.

Emotional intelligence enhances a richness of perspective about ourselves and others. The awareness of that richness gives us the freedom to choose our own role in our lives and the world around us.
